

# Budget Span

*"Due to my satisfaction with the product, the confidence in their service and the production results, we have engaged Harford's to build us a second greenhouse as our business expands."*

## *Low cost, effective crop cover for all seasons*

- Modular construction
- Corrosion resistant galvanised steel frame. Powdercoated hoops.
- Proven design, has withstood the worst storms.
- Top quality greenhouse films, 150mu or 200mu.
- Single or twin skin crop protection.
- Inflated twin skin, cuts heating costs.
- Harford aluminium Cliplock reusable film fastening.
- Hoop top, straight sides - uses all the floor area.
- Side and end vent options.
- Big galvanised walk through gutters - no leaks.
- Simple on-site construction.
- Versatile - connect to any other Harford design.

# BUDGET SPAN

Harford's Budget Span design is the cost effective alternative in plastic covered houses. A development of our original tunnel house, its design and engineering excellence have been proven through the worst of New Zealand's weather. Engineered to the same high standards as the popular Maxi Span, the Budget Span series represents exceptional value for money - without sacrificing any of Harford's renowned engineering standards.

The Budget Span is also engineered to support 15 kg/m<sup>2</sup> crop loads » which means no extra posts and lower costs for you. The Budget Span is designed for low crops, flowers or vegetables, with ventilation from the big open doors, open sides, gable end vents or siderollers or can be attached to the Harford Sawtooth to provide mid area ventilation.

Harford's unique modular design is fully utilised in the Budget Span, with standard bays 3m long and 6, 7 or 9m wide suitable for single or multi-bay installations.

Hooped top and straight side walls allow maximum use of floor area and standard siderollers can be fitted.

Galvanised walk-through gutters mean no condensation drip, exceptional water drainage, no leaks and easy servicing.

The all steel galvanised frame is finished in corrosion resistant white epoxy paint for less shade from posts; longer cover life and smart appearance. Covers are easily fitted using Cliplock plastic fasteners and roll battens to the gutters.

Harford Greenhouses use only the very best covers: Wide film 200µ lets you choose single skin or inflated twin skin covers for greater heat retention, higher light levels and thermal efficiency.

Erecting the Budget Span is easy: Harford's sleeve connections mean simple on-site construction and our own experienced building team ensures a fast, precise, low-cost service anywhere in New Zealand.

## BUDGET SPAN OPTIONS

SIZE	Truss span 6, 7 or 9 metre. Single or gutter connected multi-bay. Length modules: 3m
